PROFESSIONAL SUMMARY

Software Engineering student and developer with internship and part-time experience in React and TypeScript frontend development, plus projects in Java, Kotlin and Flutter mobile development and AI-integrated web applications. Former healthcare professional who brings strong communication, discipline and attention to detail to agile engineering teams. Seeking a remote software engineering role.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart, Python, JavaScript, TypeScript, C++, HTML/CSS
Mobile: Android Studio, Flutter
Web & Backend: React, Next.js, Node.js, REST API design and integration
AI: Generative AI API integration, prompt engineering, agentic frameworks
Tools: Git/GitHub, Apache NetBeans, VS Code, Command Line / Bash

PROFESSIONAL EXPERIENCE

Frontend Developer (Part-Time) Jan 2026 – Jun 2026
NAYLDIS – CoMe Platform | Benin

- Built and maintained frontend features in React and TypeScript, delivering responsive, accessible UI components.
- Worked with backend engineers and product managers in an agile team to integrate REST APIs and improve platform performance.
- Conducted code reviews and contributed technical documentation to improve code quality and onboarding.

Cybersecurity & Digital Forensics Intern Mar 2026
TechnoHacks Solutions Pvt. Ltd. | Remote

- Completed a structured one-month internship in cybersecurity and digital forensics.

Software Engineer Intern 2025
Commit | Remote

- Built and tested application features using JavaScript and React, following coding standards and Git/GitHub version control.
- Participated in sprint planning, stand-ups and retrospectives with cross-functional teams in an agile environment.

PROJECTS

DAMA Multi-Agent AI Platform AI Development

- Built a multi-agent AI web application with AI API integration, focused on modern web application architecture.

HealthGuard Symptom Assistant AI + Backend

- Built a symptom assistant using generative AI with server-side API handling, designed with safety-conscious application behavior.

Smart Food Ordering System Full-Stack Development

- Developed a full-stack ordering application with backend APIs, database integration, user authentication and menu and order management.

CampusCents Mobile Development | Kotlin

- Built an Android app in Kotlin with local data persistence, a structured application architecture and mobile accessibility support.

Digital Note Organizer Web Development

- Built a note-taking web app with browser storage, offline functionality, search and a clean user interface.

EDUCATION

BSc Software Engineering Expected 2028

United States International University-Africa (USIU-Africa), Nairobi, Kenya | Mastercard Foundation Scholar

- Coursework: Object-Oriented Programming, Java, Android Development, Web Development, Data Structures & Algorithms, Machine Learning

Higher Diploma in Community Health & Clinical Science 2017 - 2020

Sierra Leone

CERTIFICATIONS & TRAINING

- CS302: Software Engineering - Saylor University (Oct 2026, 36 hours)
- BUS605: Strategic Project Management - Saylor University (Oct 2026, 44 hours)
- Networking Essentials - Cisco Networking Academy, JKUATES-SkillEmpower (Dec 2025)
- AI Safari: Agentic Frameworks, AI Automation, Prompt Engineering, AI Ethics & Governance - Power Learn Project
- Cyber Shujaa Cybersecurity Program (2025)

LEADERSHIP & COMMUNITY

- Millennium Fellow (UN Academic Impact / Millennium Campus Network) - completed the "Empowering Orphans" fellowship project.
- Peer Tutor, Computer Literacy - mentored middle and high school students in digital literacy.
- Active member of the USIU-Africa Tech Club: coding challenges, hackathons and collaborative projects.

LANGUAGES

English - Fluent (Professional Proficiency)
